Testing log for *functional* test cases

CONVERSATION LOG

<000> functional test case - 0

[Initial situation: Fields - first name ** : None; last name : None; mark : None; password : None; email address ** : None;

Spelling state - close_prompt_enabled: False,
current_spelling_input_value: , spelling_interrupted: False, spelling_list: ['first name'],
after_spelling: False, waiting_message: None, saved_spelling_fields: [],
saved_spelling_values: []

Machine parameters - filling_started: False, submit_done: False,
reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: False,
all_required_filled: False, possible_next_action: spelling, warning_message: , next_slot: first
name, next_slot_required: True]

[Test case message: the email address is alice@mail.it]

[Result expected: The email address becomes alice@mail.it and next field is first
name]

[Result obtained: (effects: Modified fields - email address ** : alice@mail.it;)

(response: Web Form updated. put the value for the field first name. This field is
required Since it is a field requiring the spelling, we are going to take its value one
character at a time. insert the first character)]

<001> functional test case - 1

[Initial situation: Fields - first name ** : bob; last name : None; mark : 25,85;
password : None; email address ** : alice@mail.it;

Spelling state - close_prompt_enabled: False,
current_spelling_input_value: , spelling_interrupted: False, spelling_list: ['first name', 'last
name'], after_spelling: False, waiting_message: None, saved_spelling_fields: [],
saved_spelling_values: []

Machine parameters - filling_started: False, submit_done: False,
reset_alarm_enabled: True, submit_alarm_enabled: False, warning_present: False,
all_required_filled: True, possible_next_action: resetAllCamps, warning_message: ,
next_slot: last name, next_slot_required: False]

[Test case message: yes]

[Result expected: all the fields are reset (value=None) and the next field is first
name]

[Result obtained: (effects: Modified fields - first name ** : None; mark : None;

email address ** : None;

Modified machine parameters - reset_alarm_enabled: False,
possible_next_action: spelling)

(response: All the fields have been reset, now we restart the process. please insert the value for the field last name. This field is optional Since it is a field requiring the spelling, we are going to take its value one character at a time. please insert the first character)]

<002> functional test case - 2

[Initial situation: Fields - first name ** : robert; last name : None; mark : None;
password : p088w0r0; email address ** : alice@bob.it;

Spelling state - close_prompt_enabled: False,
current_spelling_input_value: , spelling_interrupted: False, spelling_list: [], after_spelling:
False, waiting_message: None, saved_spelling_fields: [[]], saved_spelling_values: [[]]

Machine parameters - filling_started: False, submit_done: False,
reset_alarm_enabled: False, submit_alarm_enabled: True, warning_present: False,
all_required_filled: True, possible_next_action: spelling, warning_message: , next_slot: last
name, next_slot_required: False]

[Test case message: no]

[Result expected: submit alarm is disabled, state 05]

[Result obtained: (effects: Modified spelling attributes - spelling_list: ['last name'])

(response: complete the value for the field last name. This field is optional Since it is a field requiring the spelling, we are going to take its value one character at a time. insert the first character)]

<003> functional test case - 3

[Initial situation: Fields - first name ** : lucie; last name : None; mark : None;
password : p088w0r0; email address ** : dear_alice@bob.it;

Spelling state - close_prompt_enabled: False,
current_spelling_input_value: , spelling_interrupted: False, spelling_list: [], after_spelling:
False, waiting_message: None, saved_spelling_fields: [[], []], saved_spelling_values: [[], []]

Machine parameters - filling_started: False, submit_done: False,
reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: False,
all_required_filled: True, possible_next_action: None, warning_message: , next_slot: last
name, next_slot_required: False]

[Test case message: submit]

[Result expected: The submit alarm will be enabled and we have to confirm the
action]

[Result obtained: (effects: Modified machine parameters - submit_alarm_enabled:
True, possible_next_action: submitForm)

(response: we are about to submit, are you sure you want to continue with this
action?)]

<004> functional test case - 4

[Initial situation: Fields - first name ** : lucie; last name : None; mark : 27,2;
password : p088w0r0; email address ** : alice@bob.it;

Spelling state - close_prompt_enabled: False,
current_spelling_input_value: , spelling_interrupted: False, spelling_list: ['last name'],

after_spelling: False, waiting_message: None, saved_spelling_fields: [], [],
saved_spelling_values: [], []

Machine parameters - filling_started: False, submit_done: False,
reset_alarm_enabled: False, submit_alarm_enabled: True, warning_present: False,
all_required_filled: True, possible_next_action: spelling, warning_message: , next_slot: last
name, next_slot_required: False]

[Test case message: reset]

[Result expected: The reset alarm is enabled and we have to confirm the action]

[Result obtained: (effects: Modified machine parameters - reset_alarm_enabled:
True, submit_alarm_enabled: False, possible_next_action: resetAllCamps)

(response: we are about to reset all the fields and restart the process. are you
sure you want to continue with this action?)]

<005> functional test case - 5

[Initial situation: Fields - first name ** : None; last name : None; mark : None;
password : None; email address ** : None;

Spelling state - close_prompt_enabled: True,
current_spelling_input_value: adama, spelling_interrupted: False, spelling_list: ['last name'],
after_spelling: False, waiting_message: None, saved_spelling_fields: [], [],
saved_spelling_values: [], []

Machine parameters - filling_started: False, submit_done: False,
reset_alarm_enabled: True, submit_alarm_enabled: False, warning_present: False,
all_required_filled: True, possible_next_action: spelling, warning_message: , next_slot: last
name, next_slot_required: False]

[Test case message: terminate]

[Result expected: The value adama is set for the last name, the next field is mark]

[Result obtained: (effects: Modified fields - last name : adama;

Modified spelling attributes - close_prompt_enabled: False,
current_spelling_input_value: , spelling_list: []

Modified machine parameters - reset_alarm_enabled: False,
possible_next_action: fillGenericCamp, next_slot: mark)

(response: please put the value for the field mark. This field is optional)]

<006> functional test case - 6

[Initial situation: Fields - first name ** : None; last name : adama; mark : 28;
password : None; email address ** : None;

Spelling state - close_prompt_enabled: False,
current_spelling_input_value: , spelling_interrupted: False, spelling_list: [], after_spelling:
False, waiting_message: None, saved_spelling_fields: [], [], [], saved_spelling_values: [], [],
[]

Machine parameters - filling_started: False, submit_done: False,
reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: False,
all_required_filled: True, possible_next_action: None, warning_message: , next_slot:
password, next_slot_required: False]

[Test case message: I want to modify the mark putting the value 30 instead]

[Result expected: The mark becomes 30, the next field is password]

[Result obtained: (effects: Modified machine parameters - warning_present: True,

warning_message: sorry i did not understand your request, could you reformulate please?)

(response: sorry i did not understand your request, could you reformulate please?)]

<007> functional test case - 7

[Initial situation: Fields - number of persons : None; phone number : None; birthday : None; arrival time : None;

Spelling state - close_prompt_enabled: False, current_spelling_input_value: , spelling_interrupted: False, spelling_list: [], after_spelling: False, waiting_message: None, saved_spelling_fields: [], saved_spelling_values: []

Machine parameters - filling_started: False, submit_done: False, reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: False, all_required_filled: False, possible_next_action: fillGenericCamp, warning_message: , next_slot: number of persons, next_slot_required: False]

[Test case message: 22/02/2000]

[Result expected: The birthday becomes 22/02/2000, the next field is arrival time]

[Result obtained: (response: sorry the value 22/02/2000 is not an integer, put a valid value. complete the value for the field number of persons. This field is optional)]

<008> functional test case - 8

[Initial situation: Fields - number of persons : 2; phone number : 00237651322430; birthday : None; arrival time : 07:00;

Spelling state - close_prompt_enabled: False, current_spelling_input_value: , spelling_interrupted: False, spelling_list: ['phone number'], after_spelling: False, waiting_message: None, saved_spelling_fields: [], saved_spelling_values: []

Machine parameters - filling_started: False, submit_done: False, reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: False, all_required_filled: False, possible_next_action: fillGenericCamp, warning_message: , next_slot: birthday, next_slot_required: False]

[Test case message: Could you please repeat the arrival time for me?]

[Result expected: Gives the value 07:00 of the arrival time, the next field is birthday]

[Result obtained: (response: Here is the answer for you: arrival time : 07:00 insert the value for the field birthday. This field is optional)]

<009> functional test case - 9

[Initial situation: Fields - number of persons : 2; phone number : 00237651322430; birthday : None; arrival time : 07:00;

Spelling state - close_prompt_enabled: False, current_spelling_input_value: , spelling_interrupted: False, spelling_list: ['phone number'], after_spelling: False, waiting_message: None, saved_spelling_fields: [], saved_spelling_values: []

Machine parameters - filling_started: False, submit_done: False, reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: False, all_required_filled: False, possible_next_action: fillGenericCamp, warning_message: , next_slot: birthday, next_slot_required: False]

[Test case message: which are the fields of this form?]

[Result expected: lists the five fields from phone number to card expiration date, the next field is birthday]

[Result obtained: (response: the fields present in this form are the following number of persons, phone number, birthday, arrival time. please give the value for the field birthday. This field is optional)]

<010> functional test case - 10

[Initial situation: Fields - number of persons : 2; phone number : 00237651322430; birthday : None; arrival time : 07:00;

Spelling state - close_prompt_enabled: False, current_spelling_input_value: , spelling_interrupted: False, spelling_list: ['phone number'], after_spelling: False, waiting_message: None, saved_spelling_fields: [], saved_spelling_values: []

Machine parameters - filling_started: False, submit_done: False, reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: False, all_required_filled: False, possible_next_action: fillGenericCamp, warning_message: , next_slot: birthday, next_slot_required: False]

[Test case message: which are the required fields of this form?]

[Result expected: lists zero field, the next field is birthday]

[Result obtained: (response: the required fields are the following . put the value for the field birthday. This field is optional)]

<011> functional test case - 11

[Initial situation: Fields - number of persons : 2; phone number : 00237651322430; birthday : None; arrival time : 07:00;

Spelling state - close_prompt_enabled: False, current_spelling_input_value: , spelling_interrupted: False, spelling_list: ['phone number'], after_spelling: False, waiting_message: None, saved_spelling_fields: [], saved_spelling_values: []

Machine parameters - filling_started: False, submit_done: False, reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: False, all_required_filled: False, possible_next_action: fillGenericCamp, warning_message: , next_slot: birthday, next_slot_required: False]

[Test case message: which are the optional fields?]

[Result expected: Gives the list of all the fields, they are all optimal. The next field is birthday]

[Result obtained: (response: sure the optional fields are the following number of persons, phone number, birthday, arrival time. please put the value for the field birthday. This field is optional)]

<012> functional test case - 12

[Initial situation: Fields - number of persons : None; phone number : +223615342345; birthday : 31-05-1990; arrival time : None;

Spelling state - close_prompt_enabled: False, current_spelling_input_value: , spelling_interrupted: False, spelling_list: ['phone number'], after_spelling: False, waiting_message: None, saved_spelling_fields: [], saved_spelling_values: []

Machine parameters - filling_started: False, submit_done: False, reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: False, all_required_filled: False, possible_next_action: fillGenericCamp, warning_message: , next_slot: number of persons, next_slot_required: False]

[Test case message: which are the fields still to be completed?]

[Result expected: Number of persons, arrival time. The next field is number of persons]

[Result obtained: (response: the remaining fields present in this form are the following number of persons, arrival time. fill the value for the field number of persons. This field is optional)]

<013> functional test case - 13

[Initial situation: Fields - number of persons : None; phone number : +223615342345; birthday : 31-05-1990; arrival time : None;

Spelling state - close_prompt_enabled: False, current_spelling_input_value: , spelling_interrupted: False, spelling_list: ['phone number'], after_spelling: False, waiting_message: None, saved_spelling_fields: [], saved_spelling_values: []

Machine parameters - filling_started: False, submit_done: False, reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: False, all_required_filled: False, possible_next_action: fillGenericCamp, warning_message: , next_slot: number of persons, next_slot_required: False]

[Test case message: are there required remaining fields?]

[Result expected: No remaining required field. The next field is number of persons]

[Result obtained: (response: the remaining required fields are the following . insert the value for the field number of persons. This field is optional)]

<014> functional test case - 14

[Initial situation: Fields - number of persons : None; phone number : None; birthday : 31-05-1990; arrival time : None;

Spelling state - close_prompt_enabled: False, current_spelling_input_value: , spelling_interrupted: False, spelling_list: ['phone number'], after_spelling: False, waiting_message: None, saved_spelling_fields: [], saved_spelling_values: []

Machine parameters - filling_started: False, submit_done: False, reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: False, all_required_filled: False, possible_next_action: fillGenericCamp, warning_message: , next_slot: number of persons, next_slot_required: False]

[Test case message: which are the remaining optional fields?]

[Result expected: Phone number, number of persons, arrival time]

[Result obtained: (response: the remaining optional fields are the following number of persons, phone number, arrival time. complete the value for the field number of persons. This field is optional)]

<015> functional test case - 15

[Initial situation: Fields - gender **: None; electronic devices : None; car : None; message : None;

Spelling state - close_prompt_enabled: False,
current_spelling_input_value: , spelling_interrupted: False, spelling_list: [], after_spelling:
False, waiting_message: None, saved_spelling_fields: [], saved_spelling_values: []

Machine parameters - filling_started: False, submit_done: False,
reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: False,
all_required_filled: False, possible_next_action: None, warning_message: , next_slot:
gender, next_slot_required: True]

[Test case message: audi]

[Result expected: Car has value audi. The next field is gender]

[Result obtained: (response: the choice audi is not valid for the field
gender please choose one in the following list: ['male', 'female', 'other'])]

<016> functional test case - 16

[Initial situation: Fields - gender **: None; electronic devices : None; car : None;
message : None;

Spelling state - close_prompt_enabled: False,
current_spelling_input_value: , spelling_interrupted: False, spelling_list: [], after_spelling:
False, waiting_message: None, saved_spelling_fields: [], saved_spelling_values: []

Machine parameters - filling_started: False, submit_done: False,
reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: False,
all_required_filled: False, possible_next_action: None, warning_message: , next_slot:
gender, next_slot_required: True]

[Test case message: skip]

[Result expected: The next field is electronic devices]

[Result obtained: (effects: Modified machine parameters - possible_next_action:
fillGenericCamp, next_slot: electronic devices, next_slot_required: False)

(response: Select the electronic devices in the following list none, computer,
smartphone, tablet, smart watch, smart tv, bluetooth earphones, camera, smart glasses.
This field is optional)]

<017> functional test case - 17

[Initial situation: Fields - gender **: male; electronic devices : None; car : None;
message : None;

Spelling state - close_prompt_enabled: False,
current_spelling_input_value: , spelling_interrupted: False, spelling_list: [], after_spelling:
False, waiting_message: None, saved_spelling_fields: [], saved_spelling_values: []

Machine parameters - filling_started: False, submit_done: False,
reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: False,
all_required_filled: True, possible_next_action: fillGenericCamp, warning_message: ,
next_slot: electronic devices, next_slot_required: False]

[Test case message: is the field family name present in this form?]

[Result expected: The field family name is not present. The next field is electronic
devices]

[Result obtained: (response: sorry the field family name is not present in this
form. The fields of this form are the following: gender, electronic devices, car, message
Select the electronic devices in the following list none, computer, smartphone, tablet,
smart watch, smart tv, bluetooth earphones, camera, smart glasses. This field is optional)]

<018> functional test case - 18

[Initial situation: Fields - gender **: male; electronic devices : smartphone; car : None; message : None;

Spelling state - close_prompt_enabled: False,
current_spelling_input_value: , spelling_interrupted: False, spelling_list: [], after_spelling: False, waiting_message: None, saved_spelling_fields: [], saved_spelling_values: []

Machine parameters - filling_started: False, submit_done: False,
reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: False,
all_required_filled: True, possible_next_action: fillGenericCamp, warning_message: ,
next_slot: car, next_slot_required: False]

[Test case message: can i have a point of the situation?]

[Result expected: Gives the paires field-value. The next field is message]

[Result obtained: (response: The fields you already completed are the following:
gender **: male electronic devices : smartphone The stars indicate the required fields
Select the car in the following list Volvo, Saab, Fiat, Audi, Citroen, Ford, BMW, Chevrolet,
Honda, Kia, Toyota, Lexus, Hyundai. This field is optional)]

<019> functional test case - 19

[Initial situation: Fields - gender **: male; electronic devices : smartphone; car : None; message : None;

Spelling state - close_prompt_enabled: False,
current_spelling_input_value: , spelling_interrupted: False, spelling_list: [], after_spelling: False, waiting_message: None, saved_spelling_fields: [], saved_spelling_values: []

Machine parameters - filling_started: False, submit_done: False,
reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: False,
all_required_filled: True, possible_next_action: fillGenericCamp, warning_message: ,
next_slot: car, next_slot_required: False]

[Test case message: can you tell me again what is this form about?]

[Result expected: Gives the form description. The next field is message]

[Result obtained: (response: here it is: presents various fields types in order to
test the different kind of input we can have and different actions. Select the car in the
following list Volvo, Saab, Fiat, Audi, Citroen, Ford, BMW, Chevrolet, Honda, Kia, Toyota,
Lexus, Hyundai. This field is optional)]

<020> functional test case - 20

[Initial situation: Fields - gender **: male; electronic devices : smartphone; car : None; message : None;

Spelling state - close_prompt_enabled: False,
current_spelling_input_value: , spelling_interrupted: False, spelling_list: [], after_spelling: False, waiting_message: None, saved_spelling_fields: [], saved_spelling_values: []

Machine parameters - filling_started: False, submit_done: False,
reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: False,
all_required_filled: True, possible_next_action: fillGenericCamp, warning_message: ,
next_slot: car, next_slot_required: False]

[Test case message: what is message?]

[Result expected: Explains message. The next field is message]

[Result obtained: (response: message: your suggestions or precisions Select the

car in the following list Volvo, Saab, Fiat, Audi, Citroen, Ford, BMW, Chevrolet, Honda, Kia, Toyota, Lexus, Hyundai. This field is optional))

<021> functional test case - 21

[Initial situation: Fields - first name ** : None; last name : adama; mark : None; password : None; email address ** : None;

Spelling state - close_prompt_enabled: False,
current_spelling_input_value: , spelling_interrupted: False, spelling_list: [], after_spelling: False, waiting_message: None, saved_spelling_fields: [], [], [], saved_spelling_values: [], [], []]

Machine parameters - filling_started: False, submit_done: False, reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: True, all_required_filled: True, possible_next_action: fillGenericCamp, warning_message: sorry i did not understand your request, could you reformulate please?, next_slot: password, next_slot_required: False]

[Test case message: jack]

[Result expected: First name is jack. The next field is mark]

[Result obtained: (response: The password you proposed is too short. The minimum number of characters accepted is 5 please put the value for the field password. This field is optional)]

<022> functional test case - 22

[Initial situation: Fields - first name ** : None; last name : adama; mark : None; password : None; email address ** : None;

Spelling state - close_prompt_enabled: False,
current_spelling_input_value: , spelling_interrupted: False, spelling_list: [], after_spelling: False, waiting_message: None, saved_spelling_fields: [], [], [], saved_spelling_values: [], [], []]

Machine parameters - filling_started: False, submit_done: False, reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: True, all_required_filled: True, possible_next_action: fillGenericCamp, warning_message: sorry i did not understand your request, could you reformulate please?, next_slot: password, next_slot_required: False]

[Test case message: i want to modify the first name with jack bauer]

[Result expected: First name is jack bauer. The next field is mark]

[Result obtained: (effects: Modified spelling attributes - spelling_list: ['first name'])]

(response: You will have to spell the value of the field first name. insert the first character, you will be able to use SPACE for spacing and TERMINATE to finish the spelling)]

<023> functional test case - 23

[Initial situation: Fields - first name ** : None; last name : adama; mark : None; password : None; email address ** : None;

Spelling state - close_prompt_enabled: False,
current_spelling_input_value: , spelling_interrupted: False, spelling_list: ['first name'], after_spelling: False, waiting_message: None, saved_spelling_fields: [], [], [], saved_spelling_values: [], [], []]

Machine parameters - filling_started: False, submit_done: False,

reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: True, all_required_filled: True, possible_next_action: fillGenericCamp, warning_message: sorry i did not understand your request, could you reformulate please?, next_slot: password, next_slot_required: False]

[Test case message: my first name is estelle laure harris]

[Result expected: First name is estelle laure harris. The next slot is mark]

[Result obtained: (response: You will have to spell the value of the field first name. insert the first character, you will be able to use SPACE for spacingand TERMINATE to end the spelling)]

<024> functional test case - 24

[Initial situation: Fields - first name ** : None; last name : adama; mark : None; password : None; email address ** : None;

Spelling state - close_prompt_enabled: False, current_spelling_input_value: , spelling_interrupted: False, spelling_list: ['first name'], after_spelling: False, waiting_message: None, saved_spelling_fields: [], [], [], saved_spelling_values: [], [], []]

Machine parameters - filling_started: False, submit_done: False, reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: True, all_required_filled: True, possible_next_action: fillGenericCamp, warning_message: sorry i did not understand your request, could you reformulate please?, next_slot: password, next_slot_required: False]

[Test case message: my mark is 28]

[Result expected: The mark is 28, the next field is password]

[Result obtained: (effects: Modified fields - mark : 28;

Modified spelling attributes - spelling_list: [])

(response: Web Form updated. please give the value for the field password. This field is optional)]

<025> functional test case - 25

[Initial situation: Fields - first name ** : None; last name : adama; mark : 28; password : None; email address ** : None;

Spelling state - close_prompt_enabled: False, current_spelling_input_value: , spelling_interrupted: False, spelling_list: [], after_spelling: False, waiting_message: None, saved_spelling_fields: [], [], [], saved_spelling_values: [], [], []]

Machine parameters - filling_started: False, submit_done: False, reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: True, all_required_filled: True, possible_next_action: fillGenericCamp, warning_message: sorry i did not understand your request, could you reformulate please?, next_slot: password, next_slot_required: False]

[Test case message: my mark is 28,1]

[Result expected: The mark is 28,1. The next field is password]

[Result obtained: (effects: Modified fields - mark : 28,1;)

(response: Web Form updated. put the value for the field password. This field is optional)]

<026> functional test case - 26

[Initial situation: Fields - first name ** : None; last name : adama; mark : None; password : None; email address ** : None;

Spelling state - close_prompt_enabled: False,
current_spelling_input_value: , spelling_interrupted: False, spelling_list: [], after_spelling: False, waiting_message: None, saved_spelling_fields: [], [], [], [], saved_spelling_values: [], [], []

Machine parameters - filling_started: False, submit_done: False, reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: True, all_required_filled: True, possible_next_action: None, warning_message: , next_slot: password, next_slot_required: False]

[Test case message: my mark is 28,45]

[Result expected: The mark is 28,45. The next field is password]

[Result obtained: (effects: Modified fields - mark : 28,45;

Modified machine parameters - possible_next_action: fillGenericCamp)
(response: Web Form updated. please put the value for the field password. This field is optional)]

<027> functional test case - 27

[Initial situation: Fields - first name ** : None; last name : adama; mark : 28,45; password : None; email address ** : None;

Spelling state - close_prompt_enabled: False,
current_spelling_input_value: , spelling_interrupted: False, spelling_list: [], after_spelling: False, waiting_message: None, saved_spelling_fields: [], [], [], [], saved_spelling_values: [], [], []

Machine parameters - filling_started: False, submit_done: False, reset_alarm_enabled: False, submit_alarm_enabled: False, warning_present: True, all_required_filled: True, possible_next_action: fillGenericCamp, warning_message: , next_slot: password, next_slot_required: False]

[Test case message: my mark is 28,654]

[Result expected: The mark is 28,654. The next field is password]

[Result obtained: (effects: Modified fields - mark : 28,654;)

(response: Web Form updated. fill the value for the field password. This field is optional)]

<028> functional test case - 28
